About This Book

Another riveting page-turner from one of Canada's favourite authors — and this time, the adventure takes place in outer space!

It's 2012 and the world's most renowned astrophysicists, astronomers, and theoretical mathematicians have all mysteriously and shockingly died within the same twelve-month period. But as these scientists discover, none of them are really dead after all. They have been taken hostage by alien forces. While their family and friends are mourning their passing back on Earth, these men and women of science must face the ultimate battle. Wait! Could a sixteen year old with rare gifts be the last and possibly only hope they have to triumph over evil and return themselves — and the Earth — to safety?
