Author note:

T. rex and velociraptor lived on different continents, millions of years apart. But what might have happened if they met?

*To T. rex Nancy and T. rex Alex and their little velociraptors
Brittany, Meaghan, Nick, and Tim.*

—J.P.

To my Tyrannaboyus rex—William.

—R.B.

Let's go back millions of years.

What would happen if a Tyrannosaurus rex and a velociraptor met each other? What if both of these dinosaurs were hungry? What if they had a fight? Who do you think would win?

PTEROSAURS

Millions of years ago, three types of huge creatures lived on earth. Pterosaurs flew in the sky.

DID YOU KNOW?
Pterosaur means
“winged lizard.”

PLESIOSAURS

FACT
Plesiosaur means
“close to a lizard.”

Plesiosaurs swam in the ocean.

REMEMBER
There were also other types of ocean-going reptiles:
mosasaurs, ichthyosaurs, pliosaurs, and nothosaurs.

DINOSAURS

Dinosaurs walked on land.

DEFINITION

*Dinosaur means
"terrifying lizard."*

Some dinosaurs walked on two legs, while others walked on four.

Today, pterosaurs, plesiosaurs, and dinosaurs are extinct, which means they died out.
