What would happen if a hammerhead shark came face-to-face with a bull shark? What if they were both the same size? What if they were both hungry? If they had a fight, who do you think would win?

GREAT HAMMERHEAD SHARK

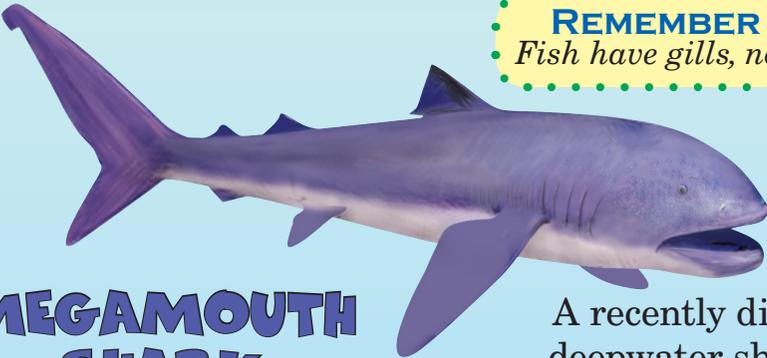

Its head has a strange shape.

MAKO SHARK

The fastest-swimming shark!

REMEMBER THIS!
Fish have gills, not lungs.

MEGAMOUTH SHARK

A recently discovered deepwater shark with a huge mouth.

BULL SHARK

This shark has attacked more people than any other shark.

WHALE SHARK

The largest fish in the world. It is a harmless filter feeder.

GREAT WHITE SHARK

The famous movie star needs no introduction!

FACT
Sharks are saltwater fish.

TIGER SHARK

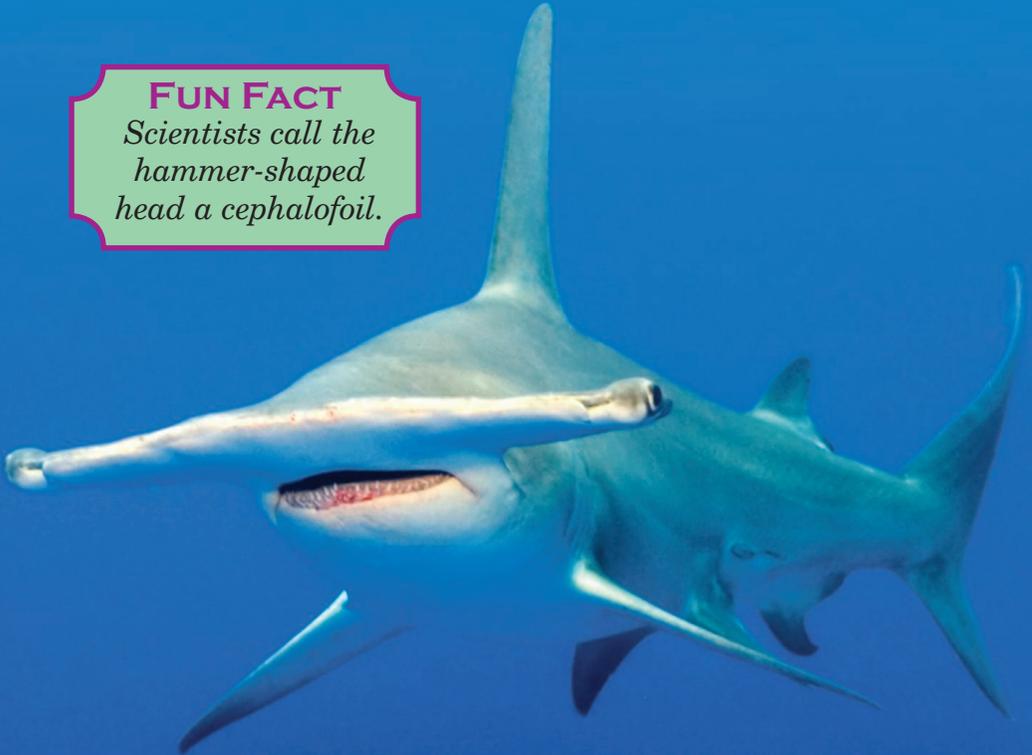

The “garbage can” of the sea. It eats almost everything.

SCIENTIFIC NAME OF GREAT HAMMERHEAD:
“*Sphyrna mokarran*”

Meet the great hammerhead. It can grow to be twenty feet long and can weigh one thousand pounds. Hammerhead sharks are easy to identify, because they have a head shaped like a hammer.

FUN FACT

Scientists call the hammer-shaped head a cephalofoil.

DID YOU KNOW?

The largest hammerheads have a head that is three feet wide eyeball to eyeball.

Hammerheads look scary, but they hardly ever attack humans.
