Making the Grade Chapter 7: In the Dark

Working with Words—Sequence

Sometimes the *order* in which tasks are completed have an impact on the outcome.

For example: To do a chemistry experiment, you must set up the equipment before performing the lab work.

To use a pattern accurately when sewing, you have to iron it when you take it out of the package to flatten it.

In the photo lab darkroom, there is a sequence to be followed when printing. Use the description on pages 43 and 44 of the text to outline the sequence of steps to print a picture.
