Scholastic Canada is pleased to share with you the findings from our first *Kids & Family Reading Report™, Canadian Edition*. We are delighted to join several of our international affiliates in an effort to get a better understanding of the reading behaviours and habits of families from around the world. These surveys began 10 years ago, when Scholastic released their initial *Kids & Family Reading Report*. Recently, their 6th edition was published, and last year, the U.K., Australia and India also released their first reports.

As 2017 marks the 60th year that Scholastic Canada has been in business in this country, we felt it was the perfect time to conduct our own study of English- and French-speaking Canadian parents and children to see if our reading habits are that different from the rest of the world. It turns out that Canadian kids and their parents aren’t that different in their attitudes about the importance of reading. But we did see some areas where, as a publisher of children’s reading materials, we have some work to do. For example, we need to help spread the word about the importance of reading aloud to your children from the time they are born.

Our hope is to use the findings from this study to continue to drive conversations about kids’ reading and the power of books, and to help us understand how we all can support children as they begin their reading journey. Perhaps even more importantly, how do we continue to inspire a love of reading as children themselves grow up and face other distractions and choices about how they spend their time.

This landmark research provides both reasons to celebrate, but motivation to work harder to ensure that all children have access to and are able to find books they love every day. While everyone agreed on the
importance of books and reading, almost half the children said they have difficulty finding the books they like, and said they look to school and parents for guidance. In today’s busy world filled with competition for parents’ and kids’ time and attention, many children mentioned that books gave them a chance to relax and use their imaginations. Children over six also said that while they aren’t read to at home as much as when they were younger, they would like to be read aloud to more often and looked forward to it as a special time spent with their parents. While the world has changed dramatically in terms of technology and access to it, it seems that children and parents agree: there’s nothing like sitting down with a book and leafing through the pages together.

Literacy empowers children to explore, communicate, debate and think critically. We hope you will find this information valuable and join us as we celebrate 60 years of sharing stories with Canadians. We look forward to continuing to foster the magic of reading in children with you.

Sincerely,

Nancy Pearson
Co-President, Scholastic Canada

Anne Browne
Co-President, Scholastic Canada
In early 2017, Scholastic, in conjunction with YouGov, conducted a survey to explore the attitudes and behaviours of English- and French-speaking Canadian children and families around reading books for fun. The key findings of this research, based on a nationally representative sample of 1,939 parents and children, including 371 parents of children ages 0–5; 784 parents of children ages 6–17; plus one child age 6–17 from the same household, are as follows:

THE STATE OF KIDS & READING IN CANADA

- The majority of children ages 6–17 (86%) are currently reading or have just finished reading a book for fun. One-third of kids (34%) are frequent readers, reading books for fun 5–7 days per week. Girls (38%) are more likely than boys (30%) to be frequent readers. (Pages 12 & 13)

- Children, particularly those who are frequent readers, gain inspiration (76%) and a sense of accomplishment (90%) from reading. (Page 25)

- Parents’ reading habits play a large role in determining how often kids read: 57% of kids who are frequent readers have parents who read books 5–7 days per week, compared to only 15% of kids who are infrequent readers. (Page 14)

- As children get older, reading for fun starts to lose out to other activities, with 50% of kids ages 6–8 reading for fun 5–7 days per week, compared to only 25% of 15–17 year-olds. Eighty-four percent of parents of children ages 6–17 would like to see reduced screen time for their kids, more so for parents of infrequent readers (90%). (Pages 13 & 22)
KEY FINDINGS

WHAT CANADIAN KIDS & PARENTS WANT IN BOOKS

- On average, families report having 80 books in the home, with frequent readers’ homes having 118 books, compared to 61 books in the homes of infrequent readers. (Page 30)

- Both parents and teachers play a key role in encouraging children to read books for fun and are among the top sources for great book ideas. (Page 37)

- One in five children and parents look for books with characters that are culturally or ethnically diverse, with 74% of parents identifying diversity in children’s books as “people and experiences that are different than those of their child.” (Pages 41 & 42)

- Ninety-four percent of children agree that their favourite books are the ones they picked out themselves, and almost all children (92%) agree that they are more likely to finish a book they picked out. (Page 33)

- Nearly 50% of kids say they have trouble finding books they like, even though only 36% of parents think their child has that problem. (Page 35)

- Nearly half of kids ages 6-17 (46%) and their parents (45%) want books that make kids laugh. Parents (41%) and kids (39%) in this age group also look for characters who face a challenge and overcome it when choosing a book to read for fun. (Pages 39 & 40)

READING ALOUD

- Nine in 10 kids ages 6–11 and their parents say they enjoy/enjoyed read-aloud time, and parents of children ages 0–5 cite reading books aloud, telling stories and talking together as among the most important things parents should do with their children to develop language skills. (Pages 56 & 63)
While more than half of children ages 0–5 are read aloud to 5–7 days per week, the frequency of reading aloud drops significantly after age 5 (41%) and again after age 8 (16%). Fifty-eight percent of kids ages 6–8 say they wanted reading aloud to continue. Among all children who are no longer read aloud to, boys are more likely to say this than girls. (Pages 59 & 62)

The top reasons parents and children ages 6–11 say they like reading aloud together are:

- It is a special time with my child/parent.
- Reading together is fun.
- It creates a love for reading. (Page 64)

More than half of parents (54%) received advice from parenting resources or friends and family that they should read aloud to their child from birth; yet, only 35% of parents of 0–5 year-olds started reading to their child before 3 months of age. (Pages 54 & 55)

Seven in 10 parents (70%) with children ages 0–5 say they started reading aloud to their child before age 1. (Page 55)

**READING IN CANADIAN SCHOOLS**

- Sixty-five percent of kids ages 6–17 have the chance to read independently during the school day with 42% saying, “I wish we would do this more often” and 34% saying, “It’s one of my favourite parts of the school day.” (Pages 70, 72 & 73)

- Few children read for an hour or more during independent reading time, and more than half (52%) read for less than 20 minutes. (Page 71)

- Ninety-seven percent of parents agree that every school should have a library. (Page 75)
Kids who read independently at school are more likely to:

- Find reading books for fun important.
- Like reading books for fun.
- Agree books have inspired them to believe in themselves.
- Read 15 more books on average per year than kids who do not read independently at school. (Page 74)

SUMMER READING

- Many kids (84%), and even more parents (96%), believe in the value of summer reading and agree that reading books during the summer will help them during the school year. (Page 81)
- Three in four kids (76%) say they really enjoy reading books in the summertime, but thirty-four percent of parents say they have to work at encouraging their child to read over the summer. (Page 80 & 82)
- Parents use many strategies to encourage summer reading, including:
  - Taking kids to the library.
  - Taking books along on vacations or road trips.
  - Stocking up on books for the summer. (Page 83)
- Only one in three (31%) parents have heard, read or received advice about the summer slide—the loss of skills during the time when students are not in school. (Page 84)
- Of parents who have heard of the summer slide (31%), 53% heard about it from their child’s teacher or school. (Page 85)
“One of the things I notice as a teacher is that children who read for pleasure tend to be more successful not just in literacy, but in their academic studies as a whole. It doesn’t matter what exactly they read, just that they read, period.”

— Mother, 5-year-old girl, Ontario
THE STATE OF KIDS & READING IN CANADA
THE STATE OF KIDS & READING

**On average kids have read 23 books in the last year**

86% of kids ages 6–17 are currently reading or have just finished reading a book for fun

---

**READING BOOKS FOR FUN**

82% of kids ages 6–17 say they should read more books for fun

82% of parents with kids ages 6–17 say they wish their child would read more books for fun

---

**FREQUENCY WITH WHICH CHILDREN READ BOOKS FOR FUN**

50% of kids ages 6–17 read books for fun 1–4 days a week

34% of kids ages 6–17 read books for fun 5–7 days a week

16% of kids ages 6–17 read books for fun less than 1 day a week
The State of Kids & Reading in Canada

**Benefits of Reading According to Parents**

- Developing vocabulary and language skills: 78%
- Using his/her imagination: 71%
- Becoming excited about reading: 68%
- Being successful in school: 64%
- Spending time away from technology: 64%

**Reading for My Future**

- 91% of kids ages 6–17 agree:
  - It is very important for my future to be a good reader

- 97% of parents with kids ages 6–17 agree:
  - It is very important for my child’s future to be a good reader

**Reading Builds Confidence**

- 76% of kids ages 6–17 say:
  - Books I’ve read have inspired me to really believe in myself

- 90% of kids ages 6–17 say:
  - I feel proud and have a sense of accomplishment when I finish reading a book
More than half of children are currently reading a book for fun, and one-third have just finished one. Younger kids are the most likely to currently be reading or have recently read a book for fun.
Girls are more likely than boys to be frequent readers, as are young children compared with older children.

**PERCENTAGE OF CHILDREN WHO ARE FREQUENT READERS (5–7 DAYS PER WEEK)**

Base: Children Ages 6–17

- Total: 34%
- Ages 6–8: 50%
- Ages 9–11: 37%
- Ages 12–14: 24%
- Ages 15–17: 25%

KIDS AGES 6–17 WHO READ BOOKS FOR FUN 5–7 DAYS A WEEK

- GIRLS: 38%
- BOYS: 30%

QK6. How many days a week do you read [ADDED FOR AGES 6–8: or look at] books for fun?
Kids who are frequent readers are more likely to have parents who read books 5–7 days per week.

“I had a hard time learning to read as a child, but once I learned, it opened up a whole new world that I loved. I would love for her to have the same enjoyment that I had as a child.”

— Mother, 11-year-old girl, Nova Scotia

QP5. How many days in a typical week do you personally read print books? Please do not count reading to your child.
Kids have read 23 books on average in the last year, with the average decreasing as children grow older.

- Ontario: 21
- Quebec: 19
- British Columbia: 25
- Alberta: 30
- All others: 24

QK15. About how many books have you read in the past year?

“Reading books has changed my life.”

—11-year-old boy, Quebec

THE STATE OF KIDS & READING IN CANADA
Six in 10 kids agree they often choose to read in their free time—this is more common among younger kids, girls and frequent readers.

CHILDREN AGREE WITH STATEMENT: “WHEN I HAVE FREE TIME, I OFTEN CHOOSE TO READ”

Base: Children Ages 6–17

QK12. Please say whether you agree a lot, agree a little, disagree a little, or disagree a lot with each of the following statements.
Seven in 10 children enjoy reading books for fun, with enjoyment highest among kids ages 9–11.

“"I like reading books because in every story there is a different adventure, so I don’t stop reading until I have to go to bed!”
—9-year-old girl, Ontario
Kids who enjoy reading most often say it is fun or entertaining and helps them learn new things. Kids who dislike reading most often prefer doing other things.

**CHILDREN’S REASONS FOR ENJOYING/NOT ENJOYING READING FOR FUN**

Base: Children Ages 6–17

- **18%**
  - It’s fun/entertaining
- **16%**
  - It helps me learn new things or points of view
- **12%**
  - I get to use my imagination/go on a fantasy
- **10%**
  - I like the characters and story
- **9%**
  - It’s relaxing
- **6%**
  - It’s a good escape or adventure
- **5%**
  - I enjoy reading
- **14%**
  - I’d rather do other things
- **5%**
  - I have trouble with reading
- **5%**
  - I’m too busy

QK29. You mentioned that you [enjoy reading books for fun/don’t enjoy reading for fun very much]. Please share with us why that is.
Across ages, eight in 10 children say they know they should read more books for fun; the same percentage of parents wish their child would read more books for fun.

QK12. Please tell me whether you agree a lot, agree a little, disagree a little, or disagree a lot with each of the following statements.

“It gives me time to reflect on what’s going on in my life.”
—16-year-old girl, British Columbia
Among parents, developing vocabulary and language skills and using imagination are the most sought-after benefits of reading.

**DESIRER BENEFITS OF CHILDREN READING FOR FUN**
Base: Parents with Children Ages 0–17

- Developing vocabulary and language skills: 78%
- Using his/her imagination: 71%
- Becoming excited about reading: 68%
- Being successful in school: 64%
- Spending time away from technology: 64%
- Having time to relax: 58%
- Discovering things he/she might not experience first-hand: 52%
- Learning from inspiring characters: 49%
- Learning ways to deal with experiences he/she is going through: 47%
- Being able to forget about real life for a while: 39%

“I feel that a joy of reading will help him go far in life, educationally. It will help him learn about different experiences, places, people and times in the world.”
—Mother, 3-year-old boy, Alberta
Children, particularly those who are frequent readers, gain inspiration and a sense of accomplishment from reading.

“Books I’ve read have inspired me to really believe in myself”

“I feel proud and have a sense of accomplishment when I finish reading a book”

QK12. Please say whether you agree a lot, agree a little, disagree a little, or disagree a lot with each of the following statements.

“Some characters in the stories have inspired me to become a better person.”

—13-year-old girl, Ontario
“I want him to be inspired by the characters and have a wonderful go-to hobby that he can do anywhere. Reading inspires a love of learning and research and creativity.”

—Mother, 5-year-old boy, Saskatchewan
WHAT CANADIAN KIDS & PARENTS WANT IN BOOKS
**WHAT CANADIAN KIDS & PARENTS WANT IN BOOKS**

**CHOICE RULES**

94% OF KIDS AGES 6–17 AGREE

My favourite books are the ones that I have picked out myself.

**AVERAGE NUMBER OF CHILDREN’S BOOKS**

On average, families report having 80 books in the home.

Families with kids ages 6–17 who are frequent readers have 118 books, & families of infrequent readers have 61 books.

**KIDS & PARENTS WANT CHARACTERS WHO...**

“face a challenge and overcome it” or are “smart, brave or strong” are the most popular among kids and parents.

**KIDS & PARENTS WANT BOOKS THAT...**

- make me laugh.
- explore places and worlds I’ve never been.

SMART

BRAVE

STRONG

FACE A CHALLENGE AND OVERCOME IT!
When it comes to diversity in children’s books, parents of kids ages 0–17 say diversity in books for kids and teens includes:

- Differently abled people (physical, emotional): 61%
- People of colour: 55%
- LGBTQ people: 34%
- People and experiences different than those of my child: 74%
- Various cultures, customs or religions: 69%

However, many kids have trouble finding books they like—and parents underestimate the challenge. 47% of kids have trouble finding books they like, compared to 36% of parents saying their child has this challenge.

Of infrequent readers, 69% struggle to find books they like, compared to 43% of frequent readers. 52% of boys versus 42% of girls have trouble finding books they like.

Frequent readers are defined as children who read books for fun 5–7 days a week, whereas infrequent readers read books for fun less than one day a week.
On average, families report having 80 books in the home, with frequent readers having more books than both moderately frequent and infrequent readers.

**AVERAGE NUMBER OF CHILDREN’S BOOKS IN HOME**

“Il a juste 1 an, mais il est tout content lorsqu’on lui montre un livre. Il sourit et commence à être attentif.”

— Grand-mère, garçon de 1 an, Québec

He’s only 1, but he gets really happy when you show him a book. He smiles and starts to pay attention.”

— Grandmother, 1-year-old boy, Quebec

QP12. Thinking back, how old was your child when he/she first started being read books aloud at home by you or another family member?
Parents of children ages 0–5 cite reading books aloud, telling stories and talking together as among the most important things parents should do to help their children develop language skills.

**PERCENTAGE OF PARENTS WHO SAY EACH IS EXTREMELY/VERY IMPORTANT IN DEVELOPING CHILDREN’S LANGUAGE SKILLS**

*Base: Parents with Children Ages 0–5*

- Read children’s books aloud: 98%
- Tell stories to my child: 97%
- Talk together, in general: 97%
- Talk about books with my child: 93%
- Read signs, labels, etc., during daily activities: 93%
- Sing songs: 89%
- Play rhyming games: 85%

“I read aloud to my child to help his learning, curiosity and communication skills, to spend time bonding while sharing the activity and to emphasize the importance of reading.”

—Father, 5-year-old boy, Quebec

QP3. How important do you think it is to do each of the following with your child in order to develop his/her language skills?
More than half of children ages 0–2 are read aloud to 5–7 days per week.

**FREQUENCY WITH WHICH PARENTS REPORT THEIR CHILDREN ARE READ TO ALOUD AT HOME**

*Base: Parents with Children Ages 0–2*

- 5–7 days a week: 56%
- 3–4 days a week: 25%
- 1–2 days a week: 12%
- 2–3 times a month or less: 7%

Q07. Overall, considering all the people in your family (including yourself) who read books aloud to your child, how often are books currently read aloud to him/her in your home?

“Ça nous permet de passer du temps en famille, rire et de suivre ensemble la même histoire.”

— Father, 2-year-old girl, Quebec

Reading as a family allows us to spend time together, laugh and follow the same story.”

— Father, 2-year-old girl, Quebec
Nearly two-thirds of children ages 3–5 are read aloud to 5–7 days per week.

“Every person should be read to at any age”
— Father, 5 year-old boy, Quebec

QP7. Overall, considering all the people in your family (including yourself) who read books aloud to your child, how often are books currently read aloud to him/her in your home?

“FREQUENCY WITH WHICH PARENTS REPORT THEIR CHILDREN ARE READ TO ALOUD AT HOME”
Base: Parents with Children Ages 3–5

- 5–7 days a week: 65%
- 3–4 days a week: 23%
- 1–2 days a week: 8%
- 2–3 times a month or less: 4%
- 0 times a month or less: 2%
While many parents of children ages 0–5 read to their child 5–7 days a week, the frequency of reading aloud drops significantly after age 5, and again after age 8.

QP7. Overall, considering all the people in your family (including yourself) who read books aloud to your child, how often are books currently read aloud to him/her in your home?

PERCENTAGE OF PARENTS WHO SAY THEIR CHILD IS READ BOOKS ALOUD 5–7 DAYS A WEEK
Base: Parents with Children Ages 0–11

QP14. Which of the following describe reasons you like(d) reading aloud to your child?
QK22. Which of these, if any, are reasons you like(d)/love(d) being read books aloud at home [when you were younger]?
QP15. What is/was the book your child most enjoys/enjoyed being read aloud over and over again?

BOOKS CANADIAN CHILDREN MOST OFTEN ARE/WERE READ ALOUD OVER AND OVER AGAIN

Caillou  Dr. Seuss  Cinderella  The Bible
Robert Munsch  The Gruffalo  Disney  Harry Potter  The Very Hungry Caterpillar
Goodnight Moon  Winnie the Pooh  Batman
“Reading keeps their brains working and exercises their imagination, which is the key to learning.”

—Father, 11-year-old boy, Quebec
READING IN CANADIAN SCHOOLS
KIDS WHO READ INDEPENDENTLY AT SCHOOL...

- Find reading important
- Enjoy reading
- Read more frequently

EVERY CHILD DESERVES A SCHOOL LIBRARY

97% OF PARENTS OF KIDS AGES 0–17 AGREE

Every child deserves a school library

TIME SPENT ON INDEPENDENT READING AT SCHOOL

65% OF KIDS AGES 6–17

Have the chance to read independently during the school day

KIDS WANT MORE TIME FOR INDEPENDENT READING

68% OF KIDS AGES 6–17 SAY

I wish we would do this more often

OR

It’s one of my favourite parts of the school day
**Help Kids Find Books They Love**

**Where to Get the Best Book Ideas**

- Encourage kids to talk to peers about books! Kids look to friends, siblings or cousins for ideas. 50%
- Ask teachers and school librarians! Kids look to them for book ideas. 49%
- Engage kids around books at home! Parents or other adult family members can be a good source for book ideas. 39%
- Try out the school book club and book fair with younger readers. Kids ages 6–11 discover new reads this way. 32%

**Summer Reading Is Important and Fun**

**Be a Reading Role Model**

- Parents are kids’ #1 source of encouragement to read books for fun 82%
- Followed by teachers & school librarians 69%
While more than six in 10 children have the chance to read independently during the school day, just 18% say this happens every or almost every school day, and overall opportunity decreases by age.

“I like reading all the time.”
—12-year-old girl, Saskatchewan

QK26. How often does each situation apply?

FREQUENCY WITH WHICH CHILDREN READ INDEPENDENTLY IN SCHOOL
Base: Children Ages 6–17

Every or almost every school day | 2–3 times a week | 2–3 times a month/Less often | Never

“Reading over the summer keeps the brain sharp.”
—Mother, 16-year-old girl, Alberta

QP29. Have you heard, read or received advice about the summer slide, that is, the loss of skills during the time when students are not in school, as it relates to kids’ reading?
Teachers and schools are the number one source for information on the summer slide.

**SOURCES OF INFORMATION ABOUT THE SUMMER SLIDE**
Base: Parents with Children Ages 6–17

- My child’s teachers or school: 53%
- Parenting magazines, websites, blogs or books (Net): 38%
- News or other media: 33%
- Friends and family (Net): 28%
- My local library: 20%
- Other (Net): 14%

“Reading over the summer months keeps the learning momentum going from previous school year.”
—Father, 10-year old boy, Ontario

QP30: Which of the following were sources of information for you about the summer slide?
NOTE: The “Friends and family” net items combine “my child’s grandparents,” “other relatives/friends” and “other parents”. The “Other” net item combines “other” and “my child’s pediatrician.”
METHODOLOGY

> The study was managed by YouGov and was fielded between January 31 and February 6, 2017. The total sample size of 1,939 parents and children includes:

  ▶ 371 parents with children ages 0–5,
  ▶ 784 parents with children ages 6–17,
  ▶ plus one child ages 6–17 from the same household.

> Parents of children ages 6–17 completed their survey questions first before passing the survey on to one randomly selected child in the target age range.

> The survey sample was sourced and recruited by YouGov using their proprietary panel and trusted partners to obtain a nationally representative sample, in accordance with the most recent population parameters available from Statistics Canada.

> To further ensure proper demographic representation within the sample, final data were weighted according to the benchmark distributions of child gender within each of three age groups (0–5, 6–11 and 12–17), within each region, from the most recent (2011) Statistics Canada Report.
ADDITIONAL STUDY METHODOLOGY

- Some survey language was modified in age-appropriate ways to ensure comprehension among children ages 6–8.

- Children ages 6–11 were not asked some survey questions that involved more sophisticated thinking than is reasonable to ask 6–11 year-olds.

- Parents were invited to help young children read the survey, but they were asked to allow children to independently answer all questions. At the end of the survey, children were asked to record the degree to which a parent helped them with the survey. Consistent with prior research, an analysis comparing the responses of children with and without parental involvement showed no significant differences.

- Virtually all (96%) of the adults interviewed were the parent or stepparent of the child surveyed. Therefore, throughout this report, we refer to adult respondents as “parents.”

- Data may not sum to 100% due to rounding.

- Due to the robust nature of the sample, it is safe to assume that any difference of 6–8 points or more between subgroups is statistically significant at the 90% or 95% confidence level.
