

Think of people you know. Some are short, some are tall. Everyone is a little different. The same is true for animals. Each species has animals of all sizes, from small to large. But did you know that certain animals grow much, MUCH larger than all others of their kind? They are the Supersize Animals!

Great Dane

When a Great Dane stands on all four legs, it is almost twice as tall as most other dogs. But watch out when it gets up on its hind legs. Then, it can reach higher than the top of a grown-up's head! A Great Dane named Zeus holds the title of Tallest Dog Ever.
