

Research-Based Approaches to Accelerating Student Achievement and Strengthening Your School Community

Engaging families in education benefits everyone. Students achieve more, families contribute more, and teachers and administrators do their jobs more effectively. Everyone wins! In this highly readable roundup of the latest research, a Harvard-based team makes a compelling case for investing in evidence-based family engagement practices—and suggests powerful ways to put those practices into action at your school or district.

KEY FEATURES

- Demonstrates how engaging families through home-school partnerships improves student learning and development
- Provides clear, specific examples of practices that really make a difference—for students, teachers, and families
- Builds teacher morale and effectiveness by showing how to develop close relationships with students and families
- Recommends research-backed practices and advice for all levels—early childhood through high school
